

Story Name		ID:	4-1	Prio:	Medium
Researching 4-1 / “Advanced Step into Safe Prime”					
As a	an end-user				
I want to	the team to getting more advanced about what is Safe Prime and what exactly the usage of it, also Carmichael Numbers and theories				
so that	they can understand what is the real usage of Safe Prime numbers for implementing on the MRT algorithm				
Estimate	Acceptance Criteria				
5	Getting a good understand of what is the usage of safe prime numbers in the application.				

Story Name		ID:	4-2	Prio:	High
MRT Algorithm 4-2 / “First Implementation Using SageMath”					
As a	an end-user				
I want to	the team to implement a first version of the SageMath MRT algorithm				
so that	they can start validate the algorithm for implementing the MRT algorithm in cryptography				
Estimate	Acceptance Criteria				
15	A working implementation of the first phase of the SageMath MRT algorithm.
