

Story Name		ID:	8-1	Prio:	Medium
CryptoCore 8-1 / “Checking the files for Montgomery operations in CryptoCore before start implementing”					
As a	an end-user				
I want to	the team to check the ‘.c’ files for Montgomery operations before start development				
so that	they can know how they could start the development process				
Estimate	Acceptance Criteria				
5	A clear vision about the Montgomery and the default MWMAC RAM operations in CryptoCore.				

Story Name		ID:	8-2	Prio:	High
CryptoCore 8-2 / “Start implementing MRT Algorithm Part (1)”					
As a	an end-user				
I want to	the team to start implementing MRT algorithm				
so that	we can have a fully functional MRT algorithm on CryptoCore				
Estimate	Acceptance Criteria				
15	A working MRT algorithm on CryptoCore using the MWMAC RAM.
