

Story Name		ID:	7-1	Prio:	High
CryptoCore 7-1 / “Understanding Memory Management”					
As a	an end-user				
I want to	the team to understand how CryptoCore works with memory management				
so that	they can start implementing the MRT on CryptoCore side				
Estimate	Acceptance Criteria				
15	A clear vision about the CryptoCore and memory management on it.				

Story Name		ID:	7-2	Prio:	High
CryptoCore 7-2 / “First step into CryptoCore development”					
As a	an end-user				
I want to	the team to start their implementation for the CryptoCore Miller Rabin test				
so that	it covers the MRT and Montgomery test cases				
Estimate	Acceptance Criteria				
5	A simple version or at least something like a pseudocode to start the real implementation by the next Sprint.
