Story Name		ID:	6-1	Prio:	High

SageMath 6-1 / "Refactor MRT Algorithm"

As a	an end-user
I want to	the team to modify the current code to make it more efficient
so that	they can start their work on the Montgomery version

Estimate	Acceptance Criteria
15	A working implementation with better efficiency for the MRT algorithm.

Story Name		ID:	6-2	Prio:	High

SageMath 6-2 / "Implementing the Montgomery algorithm"

As a	an end-user
I want to	the team to reimplement the MRT algorithm to match the Montgomery cases
so that	it covers the Montgomery test cases also

Estimate	Acceptance Criteria
10	A working implementation for the MRT function covering Montgomery.
